Dear Charles,

New Colombian Patent Application 94026650
Divisional Application of Application 94007609
PM1550/1697 - Our File: 34507A

I write to report that our Colombian associates have filed a divisional application with claims directed to the lighter and associates features. I enclose a copy of the English language claims and introduction. The specific description is identical to that of the parent application.

The divisional application has independent claims covering a lighter, a heater element, a method of manufacturing an integrated heater, a permanent heater fixture, and a smoking system. I judged that it was preferable to include the claims to the smoking system in the divisional application ad all the dependent claims to the system were concerned with features of the lighter rather than the cigarette.

I shall let you know when there is anything further to report.

Yours sincerely,

PATRICK A.D. LLOYD
